

MILLENIALS INNOVATE THROUGH CHAOS

NEWSLETTER
NO 1, JANUARY, 2022

MILC project is live and ready to help Millennials be the leaders of the future!

MILC's main objective is to provide to Millennials and organizations, innovative learning approaches for developing leadership skills.

Researches of 2019, project that 75% of the workforce in a Global level is going to be fulfilled by Millennials until 2030 - and in leadership roles, for which well-being in the workplace is the most important factor to choose a job. By creating a work environment that prioritizes work-life balance, employers can create a sustainable and healthier workforce.

And for Millennials, such work environments drive to a career path that will support their "lifestyle", which in this context, means their life outside of work. Technology is part of this, allowing for a creative flow of ideas and communication and they consider autonomy and reciprocity as foundational to the future of business leadership.

Chaos+Order = Chaordic

The Chaordic Learning approach adopts the learning style of Millennials, seamlessly blends theoretical and experimental learning and includes aspects of order and chaos (structured courses will represent order, while experimental learning and educational innovation will represent chaos). It provides a step-by-step guide of a chaordic learning methodology including the skills related to the Chaordic Leadership Responsibilities:

1. Manage yourself
2. Manage your superiors
3. Manage your peers (environment)
4. Manage your subordinates
5. Be a Mentor
